## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Acetic acid, tert-butyl ester	Liquid	Colorless	Mild
Floats on water. Flammable, irritating vapor is produced.			
Restrict access. Shut off ignition sources and call fire department. Avoid contact with liquid and vapor. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose, and throat. If inhaled will cause nausea, headache, or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to eyes. Harmful if swallowed. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water.		
<b>Water Pollution</b>	Effects of low concentrations on aquatic life are unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control authorities. Notify operators of nearby water intakes.

<b>Common Synonyms</b> Benzyl dichloride Benzylene chloride Benzylidene chloride Chlorobenzal	Liquid  Colorless to brown  Pungent  Sinks in water. Reacts with water.
Avoid contact with liquid and vapor. Keep people away. Wear positive pressure breathing apparatus and special protective clothing. Shut off ignition sources. Call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE. POISONOUS AND IRRITATING GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Wear positive pressure breathing apparatus and special protective clothing. Extinguish small fires with dry chemical, carbon dioxide, water spray, or foam; large fires with water spray, fog or foam. Combat fires from safe distance or protected location (behind barriers) with unmanned monitor nozzle.
<b>Exposure</b>	Call for medical aid.  VAPOR May be fatal if inhaled or absorbed through skin. Lacrimator. Irritating to eyes and respiratory tract. Very high concentrations may cause central nervous system depression. Effects may be delayed; keep under observation. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID May be fatal if swallowed or absorbed through the skin. May burn skin and eyes. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open if appropriate. Speed in removing material from skin is extremely important. ## 5. CHEMICAL REACTIVITY

- 5.1 **Reactivity with Water:** Readily hydrolyzes to benzaldehyde under neutral, acid or alkaline conditions.  
5.2 **Reactivity with Common Materials:** Reacts with common metals (except nickel and lead) to produce heat and Friedel-Crafts self-condensation type products along with toxic and corrosive hydrogen chloride. Heat build up causes the reaction to accelerate.  
5.3 **Stability During Transport:** Stable at atmospheric pressure and ambient temperature when kept free of reactive metals and moisture. Material (stabilized and unstabilized) should be consumed within 90 days. Exposure to moist air and/or heat reduces this period considerably below 90 days.  
5.4 **Neutralizing Agents for Acids and Caustics:** Use sodium carbonate or lime to absorb residual spill material.  
5.5 **Polymerization:** Can react with common metals (except nickel and lead) to produce Friedel-Crafts condensation products and hydrogen chloride.  
5.6 **Inhibitor of Polymerization:** Propylene oxide

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Benzoquinone 1,4-Benzoquinone 1,4-Cyclohexadienedione 2,5-Cyclohexadiene-1,4-dione Quinone	Solid, crystals  Yellow     Sinks and very slowly mixes with water.	Acrid, chlorine-like, irritating, penetrating
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID AND DUST.</b> Wear positive pressure breathing apparatus and special protective clothing. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.		
<b>Fire</b>	Combustible. Poisonous or irritating gases may be produced in fire. Cylinder may explode in heat of fire. Extinguish small fires: dry chemical, CO <sub>2</sub> , water spray or foam; large fires: water spray, fog or foam. Move container from fire area if you can do it without risk. Fight fire from maximum distance.	
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b> <b>DUST</b> Poisonous; may be fatal if inhaled. Irritating to mucous membranes. Move victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.  <b>SOLID</b> Poisonous; may be fatal if swallowed or absorbed through skin. Can cause severe damage to the eyes, skin and mucous membranes. IF IN EYES OR ON SKIN, flush with running water for at least 15 min.; hold eyelids open if necessary. Speed in removing material from skin is of extreme importance. Remove and isolate contaminated clothing and shoes at the site. Effects may be delayed; keep victim under observation. IF SWALLOWED and victim is CONSCIOUS, have victim drink large volumes of water and induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Mercaptobenzene Phenyl mercaptan Phenylthiol Thiophenol	Liquid  Colorless to light yellow  Burnt rubber, garlic like, stench  Sinks in water.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear positive pressure breathing apparatus and special chemical protective clothing. Shut off ignition sources and call fire department. Stay upwind and use water spray to knock down vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE POISONOUS GASES ARE PRODUCED IN FIRE OR WHEN HEATED. Container may explode in heat of fire. Vapor explosion and poison hazard indoors, outdoors or in sewers. Wear positive pressure breathing apparatus and special chemical protective clothing. Extinguish small fire with: dry chemical, carbon dioxide, water spray or foam. Large fires: water spray, fog or foam. Cool exposed containers with water. Combat fires from safe distance or protected location (behind barriers) with unmanned monitor nozzle.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Poisonous. May be fatal if inhaled or absorbed through skin. Irritating to eyes, skin and mucous membranes. Over exposure may cause headache, dizziness, coughing, difficulty in breathing, nausea, and vomiting. Symptoms may be delayed. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Poisonous. May be fatal if swallowed or absorbed through skin. May burn skin and eyes. Speed in removing material from skin is extremely important. IF IN EYES OR ON SKIN, immediately flush with running water for at least 15 minutes; hold eyelids open occasionally if appropriate. Remove and isolate contaminated clothing and shoes at the site. Effects may be delayed; keep victim under observation. IF SWALLOWED and victim is CONSCIOUS, have victim drink several glasses of water and induce vomiting by touching back of throat. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effects of low concentration on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Dust mask, goggles, and gloves  
3.2 **Symptoms Following Exposure:** Inhalation of MCP or DCP may cause irritation of upper respiratory tract; prolonged inhalation of concentrated pyrophosphate may cause a deposit of TCP in the lungs. Ingestion of large quantities of any form of calcium phosphate may cause nausea, vomiting, cramps, and diarrhea; MCP may also be corrosive to membranes of mouth, throat, and gastrointestinal tract. Local irritation of the eyes may result from contact with any of these phosphates; prolonged or repeated exposure to MCP may lead to chronic conjunctivitis. Contact with skin by MCP may cause local irritation or chronic dermatitis; prolonged or repeated contact with concentrated aqueous slurries of DCP may cause local irritation.  
3.3 **Treatment of Exposure:** INHALATION: move to clean air; see physician in case of persistent coughing, expectoration, chest pain, or shortness of breath. INGESTION: get medical attention quickly; induce vomiting by giving large amounts of water or warm salty water, or by tickling back of patient's throat; continue until vomitus is clear; follow with milk, eggs, or olive oil to soothe stomach. EYES: immediately flush with large quantities of running water for at least 15 min., holding eyelids apart to insure thorough flushing of eyes and lids; do not attempt to neutralize with chemical agents; get medical attention quickly; if physician is not available, continue irrigation for another 15 min. SKIN: immediately flush with water; remove contaminated clothing under shower; do not attempt to neutralize with chemical agent; get medical attention for persistent irritation.

# CARBON DISULFIDE

CBB

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Carbon bisulfide	Watery liquid  Colorless to yellow  Rotten egg to sweet odor  Sinks in water. Flammable, irritating vapor is produced.
Evacuate. Keep people away. Avoid contact with liquid and vapor. Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Extinguish with dry chemical or carbon dioxide. Water and foam may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Only approved self-contained breathing mask with full face is recommended. If the vapor concentration exceeds 2% by volume or is unknown, supplied-air respiratory equipment of appropriate design with full face masks should be used by all persons entering contaminated area. Masks should be used only for emergency situations and should be located accordingly. Almost any type of industrial clothing is satisfactory. Splashes of small quantity are not harmful to fabrics, and evaporation from clothing is quite rapid. Clothing should, however, be removed and the skin washed with water. Goggles should be used when there is any danger of CS<sub>2</sub> splashes or spray.
- 3.2 **Symptoms Following Exposure:** ACUTE EXPOSURE: mild to moderate irritation of skin, eyes, and mucous membranes from liquid or concentrated vapors; headache, garlicky breath, nausea, vomiting, diarrhea (even after vapor exposures), and occasionally abdominal pain; weak pulse, palpitations; fatigue, weakness in the legs, unsteady gait, vertigo; mania, hallucinations of sight, hearing, taste, and smell in acute, massive vapor exposures; central nervous depression with respiratory paralysis; death may occur during coma
- 3.3 **Treatment of Exposure:** INHALATION: remove victim promptly from contaminated area. Administer oxygen and artificial respiration if needed. SKIN CONTACT: wash affected areas with copious quantities of water. INGESTION: induce vomiting and follow with gastric lavage and saline cathartics.
- 3.4 TLV-TWA: 10 ppm (skin)  
3.5 TLV-STEL: Not listed.  
3.6 TLV-Ceiling: Not listed.
- 3.7 **Toxicity by Ingestion:** Grade 2; rat LD<sub>50</sub> = 0.1 - 0.99 g/kg  
3.8 **Toxicity by Inhalation:** Currently not available.  
3.9 **Chronic Toxicity:** Non-specific liver cell damage in rats; higher incidence of upper respiratory disease in humans.
- 3.10 **Vapor (Gas) Irritant Characteristics:** Vapors cause moderate irritation such that personnel will find high concentrations unpleasant. The effect is temporary.
- 3.11 **Liquid or Solid Characteristics:** Causes smarting of the skin and first-degree burns on short exposure and may cause secondary burns on long exposure.
- 3.12 **Odor Threshold:** 0.21 ppm  
3.13 **IDLH Value:** 500 ppm

- 3.1 **Personal Protective Equipment:** Chemical cartridge respirator, goggles, protective clothing, rubber gloves
- 3.2 **Symptoms Following Exposure:** Same symptoms as hydrogen cyanide. Because it irritates the eyes, throat, and lungs severely, it is unlikely that anyone would voluntarily remain in areas with a high enough concentration to exert a cyanide effect.
- 3.3 **Treatment of Exposure:** Call a physician. INHALATION: remove victim to fresh air; if he is not breathing, give artificial respiration, preferably mouth-to-mouth; if symptoms of cyanide poisoning are observed, administer amyl nitrite as instructed for HCN. INGESTION: have victim drink water or milk; do NOT induce vomiting.

## CAUTIONARY RESPONSE INFORMATION

### Common Synonyms

Liquid or gas

Colorless

Sharp, pungent odor

Poisonous vapor cloud is produced. Boiling point is 56°F.

Evacuate.  
Keep people away. Evacuate area in case of large discharges.  
AVOID CONTACT WITH LIQUID AND VAPOR.  
Wear chemical protective suit with self-contained breathing apparatus.  
Stay upwind and use water spray to "knock down" vapor.  
Notify local health and pollution control agencies.  
Protect water intakes.

### Fire

Not flammable.  
POISONOUS GASES ARE PRODUCED WHEN HEATED IN FIRE.  
Wear chemical protective suit with self-contained breathing apparatus.  
Cool exposed containers with water.

### Exposure

CALL FOR MEDICAL AID.

VAPOR  
POISONOUS IF INHALED OR IF SKIN IS EXPOSED.  
Irritating to eyes.  
Move to fresh air.  
If breathing has stopped, give artificial respiration.  
If breathing is difficult, give oxygen.

LIQUID  
POISONOUS IF SWALLOWED.  
Will burn skin and eyes.  
Remove contaminated clothing and shoes.  
Flush affected areas with plenty of water.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.  
DO NOT INDUCE VOMITING.

### Water Pollution

HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS.  
May be dangerous if it enters water intakes.  
Notify local health and wildlife officials.  
Notify operators of nearby water intakes.

## 1. CORRECTIVE RESPONSE ACTIONS

## 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Chemical cartridge respirator, goggles, protective clothing.
- 3.2 **Symptoms Following Exposure:** Similar in toxicity and mode of action to hydrogen cyanide, but is much more irritating. Can cause a marked irritation of the respiratory tract with a hemorrhagic exudate of the bronchi and trachea and pulmonary edema. It is improbable that anyone would voluntarily remain in areas with a high enough concentration to exert a typical nitrile effect.
- 3.3 **Treatment of Exposure:** INHALATION: support respiration and administer oxygen; call a doctor; if nitrile effect is seen, administer amyl nitrite. INGESTION: have victim drink water or milk; do NOT induce vomiting.
- 3.4 **TLV-TWA:** Not listed.

- 3.9 **Chronic Toxicity:** Long term exposure causes dermatitis, loss of appetite, headache, upper respiratory irritation in humans.
- 3.10 **Vapor (Gas) Irritant Characteristics:** Vapors cause severe irritation of eyes and throat and can cause eye and lung injury. They cannot be tolerated even at low concentrations.
- 3.11 **Liquid or Solid Characteristics:** Severe skin irritant. Causes second-and-third- degree burns on short contact; very injurious to the eyes.

## CAUTIONARY RESPONSE INFORMATION

### Common Synonyms

Solid crystals      White      Odorless

Sinks and mixes with water.

Protect water intakes.  
Notify local health and pollution control agencies.

### Fire

Not flammable.

### Exposure

CALL FOR MEDICAL AID.

SOLID  
Harmful if swallowed.  
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk, have victim induce vomiting.  
IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

### Water Pollution

HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS.  
May be dangerous if it enters water intakes.  
Notify local health and wildlife officials.  
Notify operators of nearby water intakes.

## 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Safety glasses, rubber gloves, and respirator with proper filter.  
3.2 **Symptoms Following Exposure:** Ingestion causes gastroenteric distress, pain, and prostration. Sensory disturbances, liver injury, and convulsions have been observed in severe intoxications.  
3.3 **Treatment of Exposure:** INGESTION: induce vomiting and follow with gastric lavage, a saline cathartic, and demulcents. Consider using atropine, opiates, and fluid therapy.  $\text{CaNa}_2\text{EDTA}$  has been effective in acutely poisoned animals and in a few humans. BAL has been found sufficiently effective in animal experiments to justify its use in human intoxication. Since the BAL-cadmium complex has a nephrotoxic action, the physician will have to decide whether or not to use this drug.  
3.4 **TLV-TWA:** 0.01 mg  $\text{Cd}/\text{m}^3$  inhalable; 0.002 mg  $\text{Cd}/\text{m}^3$  respirable fraction.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Acetaldehyde, chloro- Chloroacetaldehyde, monomer Chloroethanal 2-Chloro-1-ethanal Monochloroacetaldehyde	Liquid  Colorless  Very sharp, irritating  Sinks and mixes with water. Irritating vapor produced.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Evacuate. Shut off ignition sources. Call fire department. Wear positive pressure breathing apparatus and chemical protective suit. Stay upwind and use water spray to knock down vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE. POISONOUS GASES ARE PRODUCED IN FIRE AND WHEN HEATED TO DECOMPOSITION. Containers may explode in fire. Vapor may explode if ignited in an enclosed area. Combat fire from safe distance or protected location. Extinguish small fire with water spray, fog or foam; large fires with water spray, fog or foam. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED OR ABSORBED THROUGH THE SKIN. Irritating to eyes, nose, throat, lungs, and skin. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED OR ABSORBED THROUGH SKIN. Contact may cause burns to skin and eyes. IF IN EYES OR ON SKIN, immediately flush with running water for at least 15 minutes; lift eyelids occasionally if appropriate. Speed in removing material from skin is of extreme importance. IF SWALLOWED and victim is CONSCIOUS, get victim to induce vomiting by touching back of throat or taking syrup of Ipecac. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effects of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Hexahydrobenzene Hexamethylene Hexanaphthene	Watery liquid      Colorless      Gasoline-like odor  Floats on water. Flammable irritating vapor is produced. Freezing point is 44°F.
<b>Keep people away.</b> <b>Shut off ignition sources and call fire department.</b> <b>Avoid contact with liquid and vapor.</b> <b>Stay upwind and use water spray to "knock down" vapor.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>	
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with foam, dry chemicals or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, nausea, vomiting or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> HTH HTH dry chlorine Neutral anhydrous calcium hypochlorite	Solid granules      White  Household bleaching powder odor  Sinks and mixes with water.
Keep people away. Avoid contact with solid and dust. Wear goggles and self-contained breathing apparatus. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Not flammable. May cause fire on contact with combustibles. POISONOUS GASES ARE PRODUCED WHEN HEATED. Wear chemical protective suit including self-contained breathing apparatus. Extinguish adjacent fires with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  SOLID Irritating to skin and eyes. If swallowed, will cause nausea, vomiting or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Protective goggles, dust mask.
- 3.2 **Symptoms Following Exposure:** INHALATION: hypochlorous acid fumes given off only if compound comes in contact with acid, cause severe respiratory tract irritation and pulmonary edema. INGESTION: pain and inflammation of mouth, pharynx, esophagus, and stomach; erosion of mucous membranes, chiefly of the stomach; vomiting (hemorrhaging may cause vomitus to resemble coffee grounds); circulatory collapse, with cold and clammy skin, cyanosis, and shallow respirations; confusion, delirium, coma; edema of pharynx, glottis, and larynx, with stridor and obstruction; perforation of esophagus or stomach, with mediastinitis or peritonitis. SKIN CONTACT: may cause vesicular eruptions and eczematoid dermatitis.
- 3.3 **Treatment of Exposure:** INGESTION: swallow immediately milk, egg white, starch paste, milk of magnesia, aluminum hydroxide gel, or magnesium trisilicate gel. Avoid sodium bicarbonate because of the release of carbon dioxide. Do not use acidic antidotes; cautious gastric lavage with tap water or a 1% solution of sodium thiosulfate; milk of magnesia (1 oz) left in the stomach is useful as a mild antacid, adsorbent, demulcent, and cathartic; demulcents, such as starch, egg white, milk, gruel; opiates for the control of pain. Treat shock vigorously with intravenous fluids. Prompt surgical intervention when indicated, e.g., tracheotomy, gastrectomy. ## CAUTIONARY RESPONSE INFORMATION

### Common Synonyms

Liquefied compressed gas Greenish yellow Irritating, bleach-like choking odor

Sinks and boils in water. Poisonous, visible vapor cloud is produced.

Keep people away. AVOID CONTACT WITH LIQUID AND VAPOR.  
Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves).  
Evacuate area in case of large discharge.  
Stay upwind and use water spray to "knock down" vapor.  
Notify local health and pollution control agencies.  
Protect water intakes.

### Fire

Not flammable.  
May cause fire on contact with combustibles.  
POISONOUS GASES ARE PRODUCED IN FIRES.  
Stop flow of gas if possible.  
Cool exposed containers and protect men effecting shutoff with water.  
Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves).

### Exposure

CALL FOR MEDICAL AID.  
  
VAPOR  
POISONOUS IF INHALED.  
Will burn eyes.  
Move to fresh air.  
If breathing has stopped, give artificial respiration (but NOT mouth-to-mouth).  
If breathing is difficult, give oxygen.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
  
LIQUID  
Will burn skin and eyes.  
Will cause frostbite.  
Flush affected areas with plenty of water.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
DO NOT RUB AFFECTED AREAS.

### Water Pollution

HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS.  
May be dangerous if it enters water intakes.  
Notify local health and wildlife officials.  
Notify operators of nearby water intakes.

### 1. CORRECTIVE RESPONSE ACTIONS

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Cadmium nitrate tetrahydrate	Solid	White	Odorless
Sinks in water.			
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID AND DUST.</b> Shut off ignition sources and call fire department. Wear a dust respirator. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Not flammable. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus.		
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED. If inhaled will cause headache, coughing, or difficult breathing If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  SOLID POISONOUS IF SWALLOWED. Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

Common Synonyms	Liquid	Colorless	Unpleasant
Korax			
<b>Keep people away.</b> <b>AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear rubber over clothing (including gloves), goggles, and approved respirator. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	COMBUSTIBLE. Wear self-contained breathing apparatus, chemical protective clothing, and gloves. Extinguish with dry chemicals, CO <sub>2</sub> , or alcohol foam. Use water spray to "knock down" vapors and cool exposed containers.		
<b>Exposure</b>	CALL FOR MEDICAL AID. Move victim to fresh air. Remove contaminated clothing and shoes. Wash affected areas with plenty of soap and water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water; then induce vomiting.		
<b>Water Pollution</b>	Effects of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 1-Chloro-2-nitrobenzene o-Nitrochlorobenzene	Solid crystals Yellow Aromatic  Sinks in water.
Keep people away. AVOID CONTACT WITH SOLID AND DUST. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED IN FIRE. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with water, foam, carbon dioxide or dry chemical.
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST Irritating to eyes, nose, and throat. If inhaled can cause headache, languor, cyanosis, shallow respiration, and coma. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  SOLID Irritating to skin and eyes. POISONOUS IF SWALLOWED OR SKIN IS EXPOSED. Remove contaminated clothing and shoes. Flush affected area with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting.

<b>Keep people away.</b> Shut off ignition sources and call fire department. Evacuate area. Avoid contact with liquid and vapor. Wear self-contained breathing apparatus and protective clothing. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Water may be ineffective on fire. Extinguish with dry chemical, foam, or carbon dioxide. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR If inhaled, will cause dizziness, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Liquid camphor Liquid gum camphor Liquid impure camphor	Oily liquid  Colorless or brown or blue  Penetrating camphor odor  Usually floats on water.
Call fire department. Avoid contact with liquid. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. Extinguish with dry chemical, foam or carbon dioxide.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Not irritating to eyes, nose or throat. Move to fresh air.  LIQUID Irritating to skin and eyes. If swallowed, will cause nausea, vomiting or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.

<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear positive pressure breathing apparatus and special chemical protective clothing. Shut off ignition sources and call fire department. Stay upwind and use water spray to knock down vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE. POISONOUS GASES ARE PRODUCED IN FIRE. CONTAINERS MAY EXPLODE IN FIRE. Wear positive breathing apparatus and special chemical protective clothing. Combat fires from safe distance or protected location. Extinguish small fires with dry chemical, carbon dioxide, water spray or foam; large fires with water spray, fog or foam.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS. MAY BE FATAL IF INHALED OR ABSORBED THROUGH SKIN. Inhalation can cause liver and kidney damage. Irritating to skin and eyes. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS. MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH SKIN. Can cause severe skin and eye irritation; may cause burns. IF IN EYES OR ON SKIN, flush contaminated area with running water for at least 15 minutes; hold upper and lower eyelids open occasionally if appropriate. Speed in removing material from skin is extremely important. Remove and isolate contaminated clothing and shoes. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

# CRESYLATE SPENT CAUSTIC SOLUTION

CSC

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Cresylate spent caustic		Liquid
		Mixes with water.
Keep people away. AVOID CONTACT WITH LIQUID. Wear self-contained, positive pressure breathing apparatus and full protective clothing. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.		
<b>Fire</b>	Not flammable If water is removed, the solids may ignite spontaneously in air to produce toxic and corrosive sodium monoxide fumes. Extinguish small fires: dry chemicals (NO AMMONIUM SALTS OR UREA), carbon dioxide, water spray or foam; large fires: water spray or foam.	
<b>Exposure</b>	CALL FOR MEDICAL AID.  LIQUID Contact causes burns to skin and eyes. Harmful if swallowed. Remove and isolate contaminated clothing and shoes at the site. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open periodically if appropriate. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
<b>Water Pollution</b>	Effects on low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Crotonaldehyde Crotonic aldehyde beta-Methylacrolein trans-2-Butenal	Watery liquid      Yellow      Tar odor  Floats and mixes slowly with water. Flammable, irritating vapor is produced.
Keep people away. Avoid contact with liquid and vapor. Avoid inhalation. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	<b>FLAMMABLE:</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Combat fires from safe distance or protected location. Extinguish with dry chemical, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> Irritating to eyes, nose and throat. If inhaled, will cause coughing, nausea, vomiting, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. <b>DO NOT INDUCE VOMITING.</b>
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.

Floats on water. Flammable, irritating vapor is produced.	
Keep people away. Avoid inhalation. Shut off ignition sources. Call fire department. Evacuate area in case of large discharge. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	Call for medical aid.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause dizziness, nausea, vomiting, difficult breathing, or loss of consciousness. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Anilinobenzene N-Phenylaniline	Solid  Light tan to brown  Pleasant odor  Sinks in water.
<b>Keep people away.</b> <b>Avoid inhalation.</b> <b>Call fire department.</b> <b>Avoid contact with liquid and solid.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>	
<b>Fire</b>	Combustible. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals or carbon dioxide. Water and foam may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST Irritating to eyes, nose and throat. Harmful if inhaled. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID OR SOLID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 1-Butanamine, n-butyl Dibutylamine	Liquid	Colorless	Weak ammonia, fishy odor
Floats and mixes with water.			
Keep people away. Shut off ignition sources. Call fire department. Avoid contact with liquid and vapor. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Combustible. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, coughing or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. If swallowed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 2,4,4-Trimethyl-1-pentene	Liquid	Colorless	Gasoline-like odor
Floats on water. Flammable, irritating vapor is produced.			
Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies.			
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness, headache, difficult breathing or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

### Common Synonyms

Solid White Sharp odor

Floats on water.

**KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID AND DUST.**  
Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves).  
Shut off ignition sources. Call fire department.  
Stay upwind. Use water spray to "knock down" vapor.  
Notify local health and pollution control agencies.  
Protect water intakes.

### Fire

FLAMMABLE.  
POISONOUS GASES MAY BE PRODUCED IN FIRE.  
Containers may explode in fire.  
Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves).  
Extinguish with water, dry chemicals, foam, or carbon dioxide.  
Do not use vaporizing liquids on fire.  
Cool exposed containers with water.

### Exposure

CALL FOR MEDICAL AID.  
DUST  
POISONOUS IF INHALED OR IF SKIN IS EXPOSED.  
Move victim to fresh air.  
If in eyes, hold eyelids open and flush with plenty of water.  
If breathing is difficult, give oxygen.

SOLID  
POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED.  
Remove contaminated clothing and shoes.  
Flush affected areas with plenty of water.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting.  
IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

### Water Pollution

Effect of low concentrations on aquatic life is unknown.  
Fouling to shoreline.  
May be dangerous if it enters water intakes.

- 3.1 **Personal Protective Equipment:** Self-contained breathing apparatus or positive-pressure hose mask; rubber boots or overshoes; clothing made of material resistant to decaborane; rubber gloves; chemical-type goggles or face shield.
- 3.2 **Symptoms Following Exposure:** (The onset of symptoms is frequently delayed until one or two days after exposure.) Inhalation or ingestion causes headache, nausea, light-headedness, drowsiness, nervousness, lack of coordination, and tremor; muscle spasms and generalized convulsions may occur. Dust irritates eyes and skin and may give same systemic symptoms as for inhalation if left on skin.
- 3.3 **Treatment of Exposure:** Get medical attention after all exposures to this compound. Symptoms may be delayed for 48 hours. INHALATION: move patient to fresh air; keep him warm and quiet. EYES: flush with water for at least 15 min. SKIN: immediately wash with soap and plenty of water. INGESTION: if victim is conscious, give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Note to physician: Treat symptomatically; administration of methocarbamol or other muscle relaxant may be helpful immediately following exposure and in the absence of symptoms.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> N,N-bis(2-Methylpropyl)amine 1-Propanamine, 2-methyl-N-(2-methyl propyl)-	Liquid  Colorless  Ammonia  Floats and slowly mixes with water.
Keep people away. Avoid contact with liquid and vapor. Wear self-contained positive pressure breathing apparatus and full protective clothing. Shut off ignition sources. Call fire department. Stay upwind and use water spray to knock down vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE. Containers may explode in fire. Vapor may explode if ignited in enclosed area. Flash back along vapor trail may occur. Wear self-contained positive pressure breathing apparatus and full protective clothing. Extinguish small fires: dry chemical, CO <sub>2</sub> , water spray or fog; large fires: water spray, fog or foam. Cool exposed containers with water from the site until well after the fire is out.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose, throat. If in eyes, hold eyelids open and flush with running water for at least 15 min. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove and isolate contaminated clothing and shoes at the site. IF IN EYES OR ON SKIN, flush with running water for at least 15 min.; hold eyelids open if necessary. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> n-Decane	Liquid	Colorless	None
Floats on water.			
<b>AVOID CONTACT WITH LIQUID AND VAPOR.</b> Keep people away. Wear rubber over clothing (including gloves), goggles, and self-contained breathing apparatus. Evacuate area. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	COMBUSTIBLE. Wear full protective clothing and approved self-contained breathing apparatus with full facepiece. Extinguish with dry chemical, CO <sub>2</sub> , or foam. Water fog or spray may be used to cool exposed containers. Do not spray water directly on fire; material floats and may reignite.		
<b>Exposure</b>	CALL FOR MEDICAL AID. Move victim to fresh air. Remove contaminated clothing and shoes. Wash affected areas with plenty of soap and water. IF SWALLOWED, do not induce vomiting. If breathing is difficult, give oxygen.		
<b>Water Pollution</b>	Effects of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Chlorinated hydrochloric ether Ethylidene chloride Ethylidene dichloride			
Oily liquid	Colorless	Chloroform like ethereal	
Sinks and mixes with water.			
Evacuate. Keep people away. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Avoid contact with liquid. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Flammable. POISONOUS GAS MAY BE PRODUCED IN FIRE OR WHEN HEATED. Containers may explode in fire. Wear goggles and self-contained breathing apparatus. Extinguish with alcohol foam, carbon dioxide, or dry chemical. Water may be ineffective on fire.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  LIQUID If swallowed may cause nausea, vomiting and faintness. Irritating to skin and eyes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS have victim drink water or milk and induce vomiting.		
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** In areas of poor ventilation or high concentration, a self-contained breathing apparatus with full face mask should be worn. Chemical workers goggles, rubber gloves, and protective clothing should be worn.
- 3.2 **Symptoms Following Exposure:** INHALATION: Irritation of respiratory tract. Salivation, sneezing, coughing, dizziness, nausea, and vomiting. EYES: Irritation, lacrimation, and reddening of conjunctiva. SKIN: Irritation. Prolonged or repeated skin contact can produce a slight burn. INGESTION: Ingestion incidental to industrial handling is not considered to be a problem. Swallowing of substantial amounts could cause nausea, vomiting, faintness, drowsiness, cyanosis, and circulatory failure.
- 3.3 **Treatment of Exposure:** Call a doctor. INHALATION: Remove from contaminated area; keep warm and quiet. If breathing has stopped, give artificial respiration. Administer oxygen. EYES: Flush with large amounts of water or weak bicarbonate of soda solution. SKIN: Dilute with large amounts of water. Remove contaminated clothing. INGESTION: Attempt to empty stomach; dilute by administering fluids (tap water, soapy water, salt water, or milk).

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b>	Liquid	Colorless	Unpleasant odor that causes tears
<b>Keep people away.</b> <b>AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear rubber over clothing (including gloves), goggles, and self-contained breathing apparatus. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies.			
<b>Fire</b>	COMBUSTIBLE. Wear full protective clothing and self-contained breathing apparatus. Extinguish with dry chemical, CO <sub>2</sub> , or alcohol foam.		
<b>Exposure</b>	CALL FOR MEDICAL AID. Move victim to fresh air. Remove contaminated clothing and shoes. Wash affected areas with plenty of soap and water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water, then induce vomiting. If breathing has stopped, perform artificial respiration.		
<b>Water Pollution</b>	Effects of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Currently not available
- 3.2 **Symptoms Following Exposure:** Very large doses are followed promptly by vomiting, due to local gastric irritation; delayed emesis or diarrhea may occur. With smaller doses, symptoms usually appear 2-3 hours after ingestion. These include tingling of lips, tongue, and face; malaise, headache, sore throat, fatigue, coarse tremors of neck, head, and eyelids; apprehension, ataxia, and confusion. Convulsions may alternate with periods of coma and partial paralysis. Vital signs are essentially normal, but in severe poisoning the pulse may be irregular and abnormally slow; ventricular fibrillation and sudden death may occur at any time during acute phase. Pulmonary edema usually indicates solvent intoxication.
- 3.3 **Treatment of Exposure:** INGESTION: treatment should be done by a physician. It usually includes gastric lavage and administration of saline cathartic, phenobarbital, and parenteral fluids. Patient should be kept quiet and under observation for at least 24 hours.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Carbonic acid, diethyl ester Ethyl carbonate Eufin	Watery liquid  Colorless  Pleasant odor
Floats on water. Flammable, irritating vapor is produced.	
<b>Keep people away.</b> <b>Shut off ignition sources and call fire department.</b> <b>Avoid contact with liquid and vapor.</b> <b>Stay upwind and use water spray to "knock down" vapor.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>	
<b>Fire</b>	<b>FLAMMABLE.</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPORS</b> Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, nausea, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

# DIETHYLAMINE

DEN

## CAUTIONARY RESPONSE INFORMATION

Common Synonyms DEN	Watery liquid	Colorless	Fishy, ammonia odor
	Floats and mixes with water. Flammable, irritating vapor is produced.		
Keep people away. Avoid contact with liquid and vapor. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies.			
Fire	FLAMMABLE. Flashback along vapor trail may occur. Irritating vapors are produced when heated. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Extinguish with dry chemical, alcohol foam or carbon dioxide. Cool exposed containers with water.		
Exposure	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.		
Water Pollution	Harmful to aquatic life in very low concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Ethylzinc Zinc diethyl Zinc ethyl		Watery liquid      Colorless
		IGNITES WHEN EXPOSED TO AIR. Flammable, irritating vapor is produced.
Evacuate. Keep people away. Avoid contact with liquid and vapor. Shut off ignition sources and call fire department. Notify local health and pollution control agencies.		
<b>Fire</b>	IGNITES WHEN EXPOSED TO AIR. Extinguish with dry graphite, soda ash, or other inert powder. DO NOT USE WATER, FOAM, CARBON DIOXIDE, DRY CHEMICALS OR VAPORIZING LIQUIDS ON FIRE. DO NOT USE WATER ON ADJACENT FIRES.	
<b>Exposure</b>	Call for medical aid.  VAPOR OR DUST Irritating to eyes, nose and throat. If inhaled will cause headache, or difficult breathing. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. If swallowed will cause nausea, and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Cartridge-type or fresh air mask for fumes or smoke; PVC fire-retardant or asbestos gloves; full face shield, safety glasses, or goggles; fire-retardant coveralls as standard wear; for special cases, use asbestos coat or rain suit.
- 3.2 **Symptoms Following Exposure:** Inhalation of mist or vapor causes immediate irritation of nose and throat; excessive or prolonged inhalation of fumes from ignition or decomposition may cause "metal fume fever" (sore throat, headache, fever, chills, nausea, vomiting, muscular aches, perspiration, constricting sensation in lungs, weakness, sometimes prostration); symptoms usually last 12-24 hrs., with complete recovery in 24-48 hrs. Eyes are immediately and severely irritated on contact with liquid, vapor, or dilute solution; without thorough irrigation, cornea may be permanently damaged. Moisture in skin combines with chemical to cause thermal and acid burns; tissue may be scarred without prompt treatment. Ingestion is unlikely but would cause immediate burns at site of contact; pain, nausea, vomiting, cramps, and diarrhea may follow; if untreated, tissue may become ulcerated.
- 3.3 **Treatment of Exposure:** INHALATION: move victim to fresh air and call doctor immediately; give mouth-to-mouth resuscitation if needed; keep victim warm and comfortable; oxygen should be given only by experienced person, and only on doctor's instructions. EYES: flush with large amounts of running water for at least 15 min., holding eyelids apart to insure thorough washing; get medical attention as soon as possible; do not use chemical neutralizers, and avoid oils or ointments unless prescribed by doctor. SKIN: flush affected area with large amounts of water, do not use chemical neutralizers; get medical attention if irritation persists. INGESTION: do NOT induce vomiting; have victim drink large amounts of water or milk immediately; if vomiting occurs, give more fluids; get medical attention.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Ethylidene difluoride Ethylidene fluoride Refrigerant 152A		Liquefied compressed gas Colorless
		Sinks and boils in water. Flammable, irritating vapor is produced. Visible vapor cloud is produced. Boiling point is 76°F.
Evacuate. Keep people away. Avoid contact with liquid and vapor. Shut off ignition sources. Call fire department. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies.		
<b>Fire</b>	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Stop flow of gas if possible. Let fire burn. Cool exposed containers with water.	
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn eyes. Will cause frostbite. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. DO NOT RUB AFFECTED AREAS. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.	
<b>Water Pollution</b>	Not harmful to aquatic life.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Petroleum distillate	Liquid Colorless Gasoline-like odor  Floats on water. Flammable, irritating vapor is produced.
Evacuate. Keep people away. Shut off ignition sources and call fire department. Avoid contact with liquid and vapor. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies.	
<b>Fire</b>	Flammable. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with foam or dry chemicals. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUIDS Irritating to eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

**Wear full impervious protective clothing and approved respirator.**  
**Shut off ignition sources and call fire department.**  
**Notify local health and pollution control agencies.**

### Fire

Combustible.  
Wear full protective clothing with self-contained breathing apparatus.  
Extinguish fire with dry chemical, alcohol foam, carbon dioxide.  
Use water spray to cool exposed containers.

### Exposure

CALL FOR MEDICAL AID.

**VAPOR**  
Move victim to fresh air.  
If breathing has stopped, give artificial respiration.

Evacuate.  
Shut off ignition sources. Call fire department.  
**KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID.**  
Stay upwind. Use water spray to "knock down" vapor.  
Notify local health and pollution control agencies.  
Protect water intakes.

### Fire

POISONOUS GASES MAY BE PRODUCED IN FIRE.  
Containers may explode in fire.  
Flashback along vapor trail may occur.  
Vapor may explode if ignited in an enclosed area.  
Wear goggles and self-contained breathing apparatus.  
Extinguish with dry chemicals, alcohol foam, or carbon dioxide.  
Water may be ineffective on fire.  
Cool exposed containers with water.

### Exposure

CALL FOR MEDICAL AID.  
  
VAPOR  
Irritating to eyes, nose and throat.  
If inhaled will cause coughing or difficult breathing.  
If in eyes, hold eyelids open and flush with plenty of water.  
If breathing has stopped, give artificial respiration.  
If breathing is difficult, give oxygen.  
  
LIQUID  
Will burn eyes.  
Irritating to eyes.  
If swallowed will cause nausea and vomiting.  
Remove contaminated clothing and shoes.  
Flush affected areas with plenty of water.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting.  
IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

### Water Pollution

HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS.

Chronic exposure is mostly characterized by central nervous system symptoms, fatigue, headache, tremor, insomnia, sensory impairment, and mood changes. Such symptoms are rare however.  
3.3 **Treatment of Exposure:** INHALATION: Call for medical aid. Remove the victim to fresh air. If not breathing give artificial respiration. If breathing is difficult give oxygen. INGESTION: DO NOT INDUCE VOMITING. SKIN: Wash with soap and copious amounts of water. EYES: Flush with copious amounts of water for at least 15 minutes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Methyl ether Wood ether	Liquefied gas	Colorless	Pleasant odor
Floats and boils on water. Flammable, irritating vapor is produced.			
Keep people away. Shut off ignition sources. Call fire department. Evacuate. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies.			
<b>Fire</b>	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Let fire burn. Stop flow of gas if possible. Cool exposed containers and protect men effecting shutoff with water.		
<b>Exposure</b>	Call for medical aid.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, or loss of consciousness. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Will cause frostbite. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. DO NOT RUB AFFECTED AREAS. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
